Plug & Play lamp

There are over a thousand lamp designs

**Bedside light, reading light, lamp**

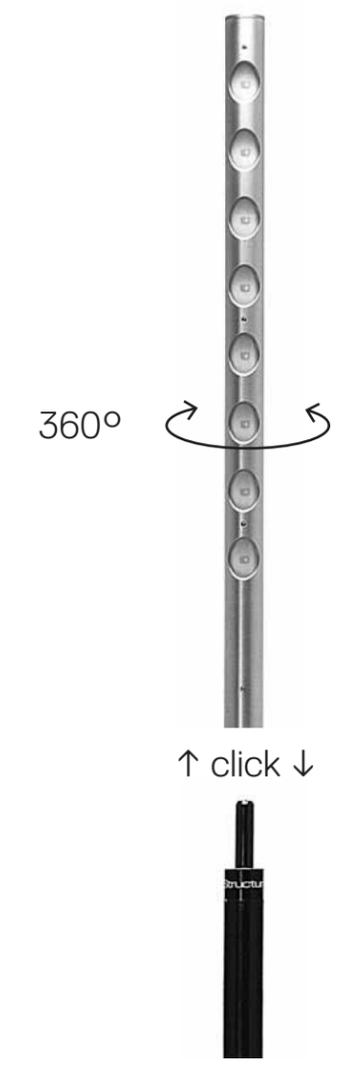

Nicolas Pichelin wanted to design a lighting system that would be entirely free of directional constraints. Once deemed insurmountable, these limits have now been eliminated through the use of creative and innovative technological solutions and materials. The connectivity and total freedom of movement of the S7 lamps open up a whole new world of lighting possibilities.

**Plug & Play lamp**

Structures has invented lamps with interchangeable heads. You'd like to change a decor or need a different type of lighting for your office, living room or bedroom? A patented, ultra-simple connection system lets you change the lamp head, but also pivot it 360 degrees to obtain the perfect lighting angle. Structures will soon bring out a collection of lamp heads that can be changed at will, with a simple click of your S7 lamp.

**S7 easily illuminates a 20 m<sup>2</sup> room, with five different lighting levels.**

- TECHNICAL DATA**
- Patented system for interchangeable lamp head
  - Lighting can be rotated 360°
  - Adjustable height: 0.80 to 2.50 meters
  - Fully modular tubular structure
  - Eight high-efficiency LEDs / 800 lumens
  - Lamp color: hot white - 2,700 k
  - Input 110-240 V / Output 24 V 350 mA
  - Low voltage and energy efficient
  - Dimmer switch to adjust intensity
  - Anodized brushed aluminum finish
  - Packaging: 60 x 60 x 10 cm
  - Weight: 2.9 kg

- MODELS / COLORS**
- Structure: white/titanium gray head  
Ref: STRUC S7V1 0101
  - Structure: black/titanium gray head  
Ref: STRUC S7V1 0201
  - Structure: black/black head  
Ref: STRUC S7V1 0202

- DESIGN AND PRODUCTION**
- Developed and designed at Manigod in Haute-Savoie
  - Parts manufactured in China and Spain
  - Assembled in France

**Structures**

Nicolas Pichelin, who founded Structures in 2004, has a passion for materials and solutions. He sees himself more as an ideas man rather than a designer. After spending fifteen years as a high-level sailor, he decided to partner his technical skills with contemporary artists to help them produce their complex works. In 2012 Nicolas Pichelin and Jean-François Michon joined forces, and Structures began to design and market the S7 lamps. The company founders are committed to developing useful design concepts and producing high-quality products. Their goal is not style, but rather the style of efficiency.
